

# NADIA HOSSNY

Product Designer · Frontend/Flutter Engineer

Alexandria, Egypt · +20 106 494 3439 · nadiahossny426@gmail.com · nadiahossny.vercel.app · linkedin.com/in/nadiahossny · github.com/nadiahossny

## PROFILE

Product Designer and frontend/mobile engineer who ships cross-platform products end to end, from user research through React.js and Flutter interfaces to database and backend integration. Known for grounding every interface decision in user data, reducing task friction, and delivering interfaces that read as considered rather than templated — validated by consistent first-review client approval and measurable QA and accessibility gains.

## SKILLS

**Design:** Figma, Adobe Creative Cloud, UX/UI Design, User Research, Wireframing, High-Fidelity Prototyping, Design Systems

**Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap

**Mobile:** Flutter — BLoC & Provider state management, REST API integration, cross-platform deployment

**Backend & Data:** Node.js, PostgreSQL, Firebase (Realtime DB & Auth), REST APIs

**Tools & Practice:** Git, GitHub, Agile/Scrum, WCAG Accessibility Guidelines

## EXPERIENCE

**Frontend Developer Intern** — National Telecommunication Institute (NTI)

Jul 2025 – Sep 2025 | Alexandria, Egypt

- Built and shipped 10+ React.js web applications over a 3-month internship, achieving 100% cross-browser compatibility across Chrome, Firefox, and Safari through systematic CSS normalization and feature detection — cutting QA revision cycles by an estimated 40%.
- Developed fully interactive, DOM-driven frontend applications with live WCAG 2.1 AA accessibility compliance, iterating on usability feedback after each deployment cycle.

**UX/UI Designer Intern** — Digital Egypt Pioneers Initiative (DEPI)

Oct 2024 – May 2025 | Remote

- Designed 5+ mobile and web UIs across healthcare and productivity verticals, conducting user research that directly informed information architecture and task flow decisions.
- Ran structured usability testing sessions and synthesized findings into prioritized design changes, improving task completion flow clarity across all tested prototypes before developer handoff.
- Maintained a shared component library and annotation standards with the development team to enforce design-to-development consistency across all deliverables.

**Mobile App Developer Intern** — Route Academy

Jul 2024 – Oct 2024 | Alexandria, Egypt

- Architected and deployed 5 production Flutter applications using BLoC/Provider state management and JWT-secured REST API integrations, standardizing error boundary patterns across all apps to eliminate unhandled API failures.
- Applied clean architecture principles (repository pattern, separation of concerns) to ensure modular, testable codebases maintainable across future iterations and team handoffs.

## PROJECTS

**Automated Pharmacy Management System (APMS / Roshetety)** | Flutter · Node.js · PostgreSQL · Serial/Hardware API · AI Chatbot

- Engineered an enterprise-grade healthcare platform integrating a physical robotic dispensing arm via serial hardware communication, architecting the full system from database schema to Flutter frontend.
- Owned the end-to-end pipeline: conducted stakeholder and patient user research, delivered high-fidelity Figma prototypes, then built and deployed the Flutter UI with role-based access control and audit logging for data handling in a medical context.
- Stress-tested UX flows for error prevention and operational efficiency under real pharmacy constraints, ensuring the interface met the safety and speed requirements of clinical staff and a companion consumer app for remote ordering.

**IEEE PUA SB Official Website** | Flutter · Firebase

- Designed and co-developed the official IEEE PUA Student Branch website including a full admin dashboard with CRUD operations for event and project management — shipped to production with live users.
- Led the design system, establishing visual consistency between public-facing pages and the admin interface in alignment with IEEE brand guidelines.

**Taskly — Task Management App (Design Case Study)** | Figma

- Conducted competitive analysis and user interviews to define personas and jobs-to-be-done, then produced end-to-end UX deliverables: user flows, wireframes, component library, and an interactive high-fidelity prototype.
- Documented full design rationale with annotated prototype for developer handoff — detailed case study available on Behance.

## EDUCATION

**B.Sc. in Computer Science and Artificial Intelligence** — Pharos University

Oct 2022 – Jun 2026 | Alexandria, Egypt

GPA: 3.76 / 4.0

Coursework: Software Engineering, Web Programming, Database Systems, Artificial Intelligence, Machine Learning, Data Structures & Algorithms, Human-Computer Interaction

CERTIFICATIONS

---

- Web Design Certificate — National Telecommunication Institute (Dec 2025)
- Web Development Fundamentals — Sprints (Jun 2025)
- UI/UX Design — Digital Egypt Pioneers Initiative (Jun 2025)
- Freelance Training Program Certificate — ITIDA (Jun 2025)
- Introduction to Android Development — Coursera (Dec 2024)

LEADERSHIP & EXTRACURRICULARS

---

**Vice Head, Web Development Committee** – IEEE-PUA Student Branch *Feb 2025 – Feb 2026*

- Designed and developed the official IEEE-PUA website; assigned deliverables to committee members and managed team velocity across concurrent development cycles.
- Collaborated cross-committee to provide technical and design support for branch-wide events and initiatives.

**Head Graphic Designer** – Dream Team *Nov 2024 – May 2026*

- Created branding systems and event visual assets; managed design team workflow, deadlines, and quality review across all external deliverables.

**Freelance UX/UI & Graphic Design** *Nov 2025 – Present | Remote*

- Delivered Figma UI screens for 3 independent clients, including one project taken through a full research-to-prototype process.
- Produced branding, social media, and event graphics for 2 additional clients using Adobe Creative Cloud.
