PROFESSIONAL SUMMARY

Product designer with paid freelance UI/UX experience and a graphic-design background. Translates user needs into user flows, wireframes, prototypes, and finished web and mobile interfaces. React and Flutter experience supports practical implementation choices and developer collaboration.

CORE SKILLS

Product and UX: Problem definition, user research, user interviews, competitive analysis, user flows, information architecture, wireframing, prototyping.

Interface and delivery: Figma, reusable components, responsive layouts, typography, visual hierarchy, client briefs, feedback, revisions, and design handoff.

Supporting knowledge: React and Flutter implementation, HTML/CSS, Firebase, usability-testing methods, and accessibility guidelines.

RELEVANT EXPERIENCE AND PROJECTS

Freelance UI/UX & Graphic Designer

Independent client work | Remote

- Completed an Upwork UI/UX engagement from user flows to high-fidelity screens.
- Delivered selected Gotcha app-redesign screens and visual assets for clients.
- Managed client briefs, feedback, revisions, and final design delivery.

Automated Pharmacy Management System (APMS)

Product Designer & Flutter Developer | Pharos University | Team graduation project

- Researched pharmacy workflows and designed pharmacy-management and patient-app experiences.
- Implemented Flutter interfaces for both applications, including patient ordering and order-status flows.
- Collaborated with teammates responsible for AI and hardware within a system using Node.js, PostgreSQL, and WebSockets.

AuraLeaf - Independent Study Workspace

Product design | React and Tailwind CSS

- Designed a study workspace with a focus timer, ambient audio, and notes, directing AI-assisted implementation.
- Replaced freely movable notes and task tools with sliding panels to support the intended calm experience.
